

Kiddo – Healthy Snacks for Kids

Project Idea

Kiddo is a startup project focused on improving children's nutrition by providing healthy snack alternatives made from natural ingredients.

The project aims to reduce children's consumption of harmful sugars and artificial additives by offering snacks that are both nutritious and enjoyable.

Problem

Many snacks available in the market contain high levels of sugar, artificial colors, and preservatives that may negatively affect children's health and eating habits.

Solution

Kiddo provides healthy snacks that are:

- Made from natural ingredients
- Free from harmful sugars
- Free from artificial additives
- Designed specifically for children's nutritional needs

Target Audience

- Children (ages 4–12)
- Parents interested in healthy nutrition
- Schools and educational institutions

Project Goal

The goal of Kiddo is to encourage healthy eating habits among children while providing safe, nutritious, and delicious snack options.
